

Looking to increase the foot traffic to your retail location?
Consider adding NEVI-funded EV Charging Stations.

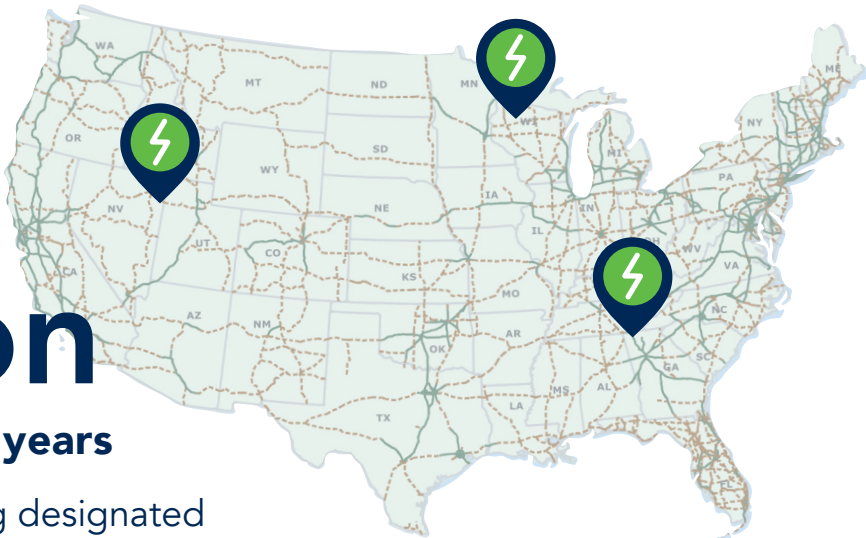

If you operate within one mile of a major highway, you might qualify for government funding through the **National Electric Vehicle Infrastructure (NEVI) Funding Program**

What is NEVI?

\$5.4 Billion

in government funding over 5 years

for EV charging stations located along designated highway routes called *alternative fuel corridors*

Who benefits from NEVI-supported EV charging stations?

Drivers

Makes long-distance travel easier and reduces "range anxiety"

Communities

Increases parity in clean energy access and adoption

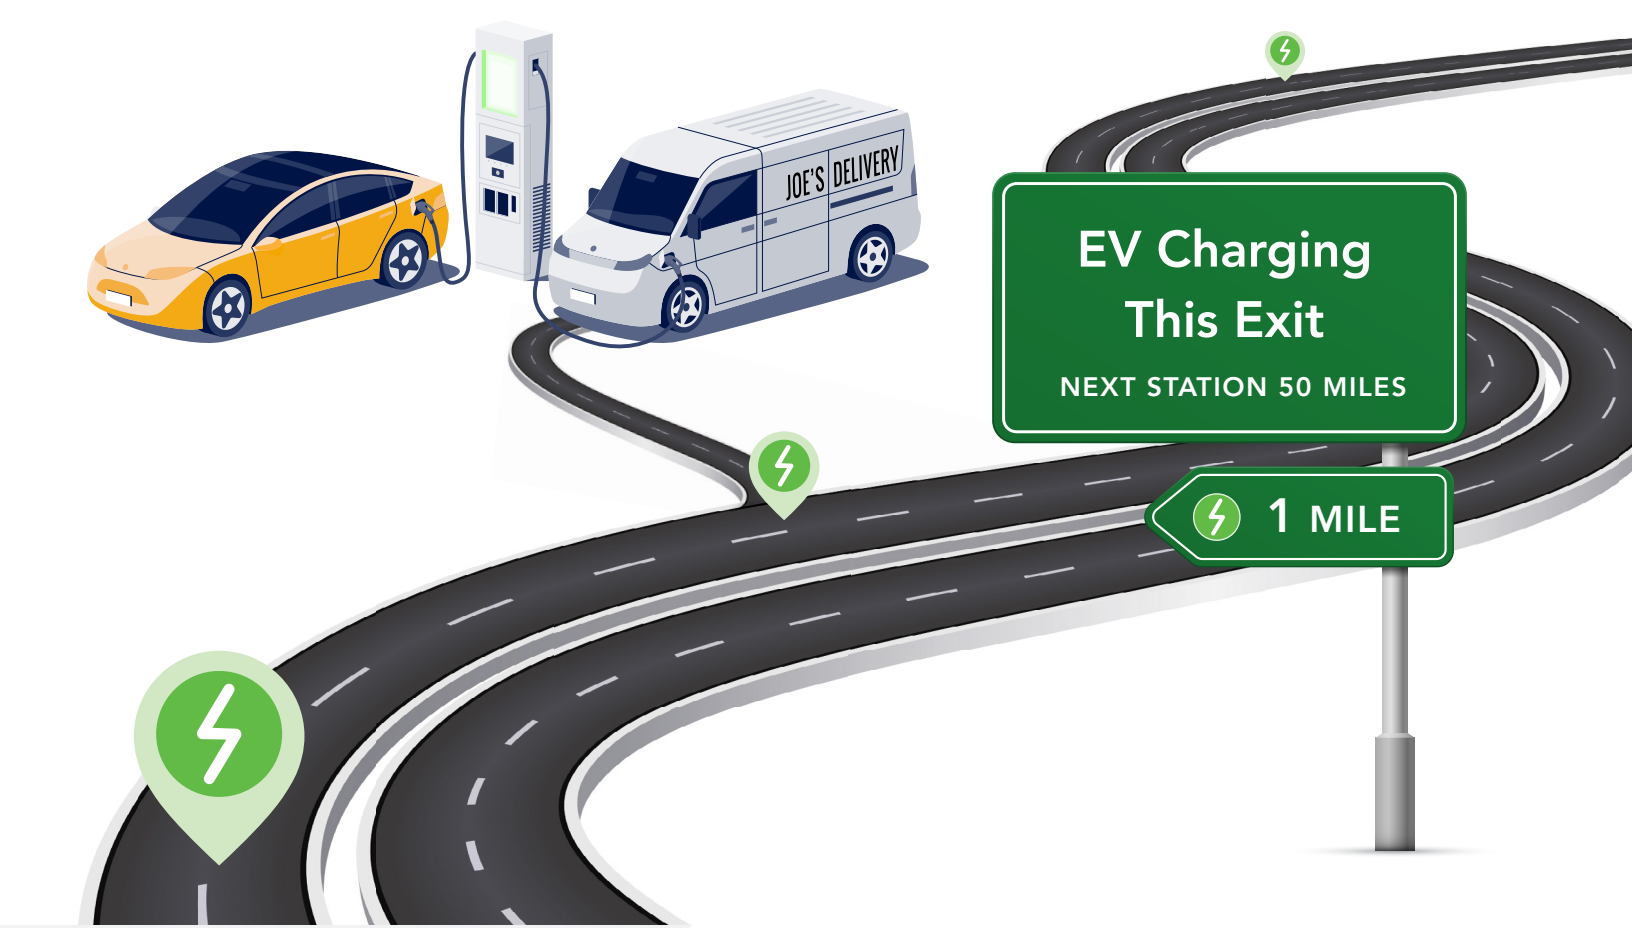

Planet

Reduces environmental impact by improving clean transportation

What is covered by NEVI?

Program funding covers 80% of

- ✓ Planning costs
- ✓ Installation, operation and maintenance
- ✓ Network connectivity
- ✓ Traffic control devices and signage
- ✓ Data sharing and reporting

Are there key requirements for receiving NEVI funding?

- ✓ No more than fifty miles from another NEVI-approved charge station
- ✓ Within one mile of approved interstates and highway corridors
- ✓ 150kW DC fast chargers with universal plugs
- ✓ Ability to accommodate four charging vehicles at once
