

Cooperative Purchasing Made Simple

With BTC POWER, cooperative purchasing isn't just easy—it's a game-changer. Our proven solutions, industry expertise, and commitment to innovation ensure that your EV infrastructure is built for long-term success. Take the hassle out of procurement and accelerate your electrification goals with a trusted partner.

A purchasing co-op allows multiple organizations, such as cities, municipalities, schools and more to buy EV chargers and related services under pre-negotiated contracts, simplifying the procurement process.

Power up your future with BTC POWER—where reliability meets innovation.

General Services Administration (GSA)

Federal agencies and eligible entities can acquire BTC POWER's EV charging solutions through the GSA EVSE BPA, streamlining procurement under federal government-approved pricing and terms.

NASPO ValuePoint

The cooperative purchasing division of the National Association of State Procurement Officials (NASPO) offers competitively bid contracts for state agencies, local governments, and educational institutions across the U.S. Partner contracts cover hardware, software, and turnkey services.

791 Purchasing Cooperative

791 provides cooperative purchasing solutions for school districts, municipalities, and other public entities. BTC POWER's contract offers a full suite of EV charging equipment and support services.

Purchasing Cooperative of America (PCA)

PCA serves government agencies, schools, and non-profits with competitively bid contracts for various services, including EV charging infrastructure. BTC POWER's contract ensures access to reliable and cost-effective charging solutions.
