FOR IMMEDIATE RELEASE

## Jacksons Food Stores Announces the Addition of OnPoint EV Super-Fast Level 3 Charging Stations at Selected Stores in California, Idaho and Washington.

**March 14, 2025**, Jacksons Food Stores, working with OnPoint EV Solutions, will offer Level 3 Fast Charging Electric Vehicle “EV” charging stations starting in Summer of 2025. Cory Jackson- President of Jacksons Foods and Rolly Woolsey, CEO of OnPoint EV Solutions broke ground on March 14, 2025.

OnPoint EV Solutions DC Super-Fast Level 3 EV Charging Stations, which include a Solar Canopy, High Speed Internet Services, Security Cameras and Digital Kiosks integrated with Jacksons Store and OnPoint’s Mobile App will be installed at the following Jackson Food Stores locations:

Right to Left- Rolly Woolsey-CEO OnPoint EV, Cory Jackson-President Jacksons, Todd Michael- SR VP, Jacksons and Russ Mykytyn- CSO OnPoint EV

### Idaho

- Store 85 is located at 612 Northside Blvd in Nampa, ID
- Store 105 is located at 3291 E. Pine Street in Meridian, ID
- Store 237 is located at 2001 Highway 30 West Fruitland, ID
- Store 244 is located at the SE Corner E Franklin and Star Road, Nampa, ID

### California

- Store 212 is located at 2281 W Casmalia St, Rialto, CA
- Store 213 is located at 1215 Hidden Valley Pkwy in Norco CA

### Washington

- Store 248 is located at 2300 Canyon Road, Ellensburg, WA
- Store 249 is located at 3709 S Geiger BLVD, Spokane, WA
- Store 250 is located at 6606 E Broadway Ave, Spokane Valley, WA

These sites are expected to deliver DC Super-Fast Level 3 charging to thousands of EV drivers traveling the I-84 corridor in Idaho, the I-15 corridor in Southern California, and the I-90 corridor in Washington State daily.

As part of OnPoint EV Solutions’ new partnership with Uptime Charger, a national EV Charging EPC and Management company from Michigan, Influent Energy, a leading Solar energy company from Kansas City, and Argent Associates, JV Partner and Network and Digital Kiosk company from Plano, TX. OnPoint will initially deploy 4-180kW public direct-current fast-chargers (DCFC) connectors across these 9 Jacksons Store sites.

“Adding EV Charging to Jacksons stores gives even more drivers access to best-in-class services like fresh food, beverages, groceries, clean restrooms and, of course, the very good chance they’ll be offered a free banana,” said Cory Jackson, Jacksons Food Stores President. “Electric Vehicle owners embrace innovation, making them a great fit with the Jacksons brand and all its offerings. Let’s go!”

Rolly Woolsey, co-founder of OnPoint EV Solutions added, “by delivering Fast Speed Wi-Fi connectivity at these Jacksons stores and OnPoint’s EV Chargers tied to the OnPoint EV App, which can be downloaded from either the Apple or Google Stores, we are looking to improve the entire EV Charging Experience. In the near future, EV customers will be able to reserve a charging session and link to the Jacksons store app to preorder services and get curb-side delivery.”

In addition to the installation of EV Charging stations at selected Jacksons Stores, OnPoint EV, in collaboration with our Joint Venture partner, Argent Associates, will be testing the new UX Edge™ interactive digital kiosk to further enhance the EV Charging Experience. “The UX Edge kiosks provide engaging entertainment and informative content while vehicles are charging, including directions, nearby points of interest and Jacksons Store point-of-sale promotions,” stated Betty Manetta, CEO of Argent Associates.

## EV CHARGING NEWS

“The partnership between OnPoint EV Solutions, Uptime Charger, and Argent is another step closer to making the energy transition more achievable. As demand grows, this is an exciting time for EVs, and collaborations like this will ensure success. Uptime Charger is proud to support OnPoint EV’s commitment to lowering the barriers consumers may face with EVs and charging stations,” says Bill Policastro, Founder of Uptime Charger.

OnPoint EV Solutions charging stations, manufactured in the USA by BTC Power, will provide up to 360kW for a single car, with a minimum of 180kW charge when both dispensers are in use. Electric Vehicles will be able to recharge their cars in 20-30 minutes from 20% to 80% capacity depending on their charge acceptance rates. The initial 4 charging dispensers at each site will be deployed with CCSI connectors, with NACS connectors for Tesla vehicles to follow. The charging stations will be covered by a Solar Canopy, with bright LED lighting, security cameras and high-speed managed Wi-Fi. All charging stations will accept credit cards, debit cards, Apple Pay and Google Pay.

Charging Stations will be available 24 hours a day, every day and be competitively priced with a guaranteed uptime.

The nine Jacksons OnPoint EV Charging sites are targeted to come online by summer 2025. We anticipate many more sites to follow in late 2025 and into 2026.

### **About Jacksons Food Stores**

Since John D. Jackson founded Jacksons in 1975 as a single service station, the family-owned company has grown to be a nationally recognized chain of 300+ company-operated convenience stores in Idaho, Nevada, Oregon, Washington, Arizona, California, Montana and Utah under the Jacksons Food Stores and ExtraMile by Jacksons Convenience Store brands.

### **About OnPoint EV Solutions**

***Focused on finding forward-thinking solutions within the EV Charging market.***

Middleton, ID, OnPoint EV Solutions is an EV charging technology and software company focused on meeting the needs of its clients through designing, building and deploying electric vehicle charging solutions as service programs to various target markets. Co-founded in 2023 by Rolly Woolsey, local Boise State All American and former NFL Player, and several partners, OnPoint EV Solutions was started to address the growing frustrations felt by EV customers that have to drive off the beaten path to find a charging station. With over 350 Jacksons stores located at major intersections across 7 states, OnPoint EV’s logical step in launching the company had to start by partnering with life-long friend John Jackson.

OnPoint EV Solutions partnered with leading regional and national companies, like Uptime Charger, BTC Power, EV Connect, Influent Energy, Argent Associates, Oldcastle PreCast and others to meet the needs of all electric vehicle customers who demand a high level of service, availability and convenience when recharging away from home.

Our app is designed to deliver a frictionless and convenient electric vehicle charging experience to all EV customers. Our seamless integration through our app will allow customers to reserve charging sessions, integrate on-demand charging services, while simultaneously ordering from convenience stores or local establishments where the EV charging station is located.

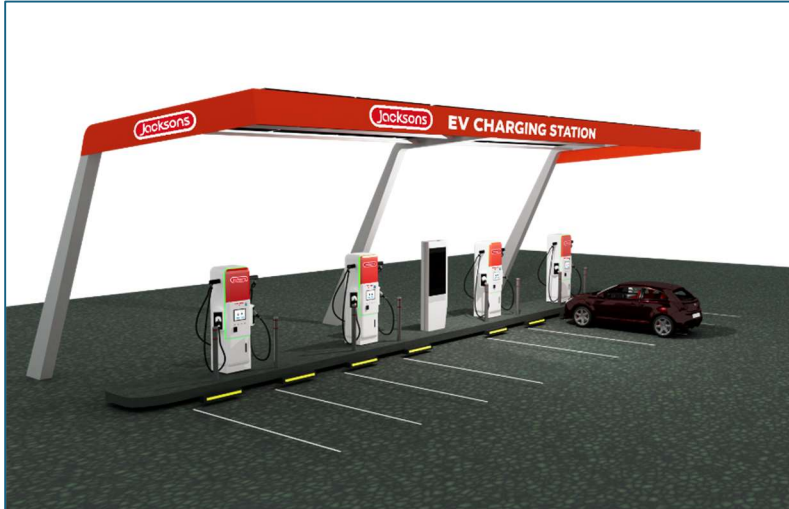

### **About Uptime Charger**

Uptime Charger is a total energy partner that simplifies the transition toward energy decarbonization and decentralization. Uptime Charger is OnPoint EV’s dedicated partner in E2E EV charging solutions. With an extensive network of certified electricians nationwide, Uptime offers optimized EVSE solutions tailored to your sites. Their expertise ensures maximum uptime after charger installation, and their maintenance services guarantee swift turnaround within 24 to 48 hours, will allow OnPoint to deliver 97% SLA. Uptime. Uptime Charger’s mission is to provide reliable, high-quality, and transformational energy solutions with end-to-end services.
